

I wanted to comment on your recent efforts to expand LPFM stations. And, your proposal that would give them priority over FM translator stations on the air waves. I do not wish this to happen. May of the stations I listen to are broadcast on translator stations. (which include 102.7, 90.1, CSN and others .) I listen to these stations because they are commercial free and always appropriate for family and children's ears. I feel these stations are a great benefit to our community. They reach out to help people in many ways, provide safe music and news for all, help families in times of need, and more. I think these stations forced off the air would have a negative effect on our community. It is in the interest of our community to have these stations. To replace this source of light and hope with others that are filled with the filthy things so excepted in today's society, would hurt our families and community. There is great value in regional and national programing! please don't replace KLOVE and CSN with programs not appropriate for our kids.
